

PATHWAYS HEALTH CENTRE FOR CHILDREN

Augmentative Communication Services - Training Session #2

Navigation Tips for PODD

- We will focus on the messages contained on **pages 1a and 1b** of the PODD (**20 squares per page**).
- Use the **“turn the page”** button for items on the next page.
- Use the **“oops”** button if you have touched the wrong button or turned the page accidentally.
- Use the **“uh-oh”** button if something has dropped on the floor or you have run out of juice, etc.
- For the **9, 12 and 40 squares per page** layouts follow the same patterns; slight differences may exist in the location of the message buttons.

Navigation Tips for Proloquo2go (P2G)

- We will focus on the messages contained on the **home page** of Proloquo2go (core words) to become familiar with them and how often they can be used.
- Proloquo2go may not have a message button for **“oops”**.
- Message buttons can be added to correct a miscommunication if desired by the client or caregiver.

Try the Following Practice Phrases

The practice phrases below are provided to get you started. Continue to use the messages on the pages (indicated above) during your interactions throughout the day. If there are any questions after reading the above information and practicing the phrases below, please contact ACS.
