

COORDINATED SERVICE PLANNING

Coordinated Service Planning is a family-centred approach to coordinating multi-sector services for families of children and youth with multiple and/or complex special needs

WE WILL...

- work with you and your child/youth to develop meaningful goals to support your child's/youth's unique strengths and needs
- connect you with the professionals who work with you and your child/youth
- lead a meeting with your family that brings all professionals together as a team to discuss your family-centred goals
- develop a written plan that outlines your family's goals and how each goal will be achieved
- follow up with each professional and keep you informed

WE HELP YOU...

- tell your story once, and be better understood by all professionals working with your child/youth
- be confident to make informed decisions about your child's/youth's care and your family's needs
- get support to monitor the need and progress of your child/youth through your coordinated service plan
